MIDI MULTI-POLE POLE COMBINATION FUSE BLOCK 58V

Littelfuse

58V

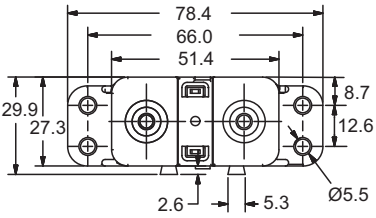

The MIDI-Flex fuse block is used with the MIDI style bolt-down fuse, which is available up to 200 A. Bolt Mount or tie-mounting options. This holder offers a flexible cover, which allows cable entry from virtually any direction, large wire size, and ring terminal stack up. Dovetail features allow you to interlock multiple MIDI-Flex fuse blocks together for a high power distribution block or lock other Littelfuse Power Distribution products together. Midi-Flex, Mega-Flex, HWB60, FLEC & EPC.

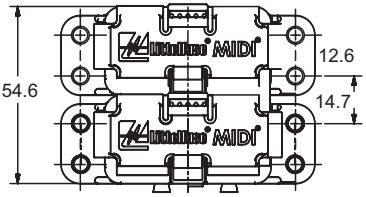

Midi-Flex Fuse Block

Features

- Flexible cover allows for cable entry from virtually any direction.
- Dovetail features allow you to interlock multiple MIDI-Flex fuse blocks together to create a high power distribution block.
- Slots in the base allows the holder to be mounted with tie-wraps.
- Zinc plated steel hardware and tin-plated 100% pure copper optimize long-term corrosion protection.
- Bus bars are available for multiple holder applications.

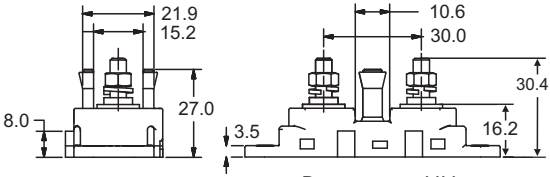

Part Number	Description
04981038	1 Pole Fuse Block with Flexible Cover
04982001ZXFC	2 Pole Fuse Block with Flexible Cover & Busbar
882-267-002	Bus Bar (2 holes - spans 2 blocks)
882-267-003	Bus Bar (3 holes - spans 3 blocks)
882-267-004	Bus Bar (4 holes - spans 4 blocks)
882-267-005	Bus Bar (5 holes - spans 5 blocks)

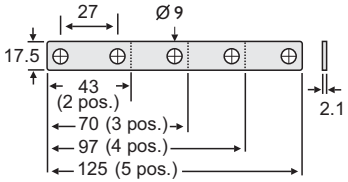

Voltage: 58VDC **Rating:** 200A
Hardware: Includes hex nuts & split washers.
Studs: M5 threaded zinc plated steel studs.
Flammability: UL94 V-0
Wire Size: 8mm² to 35mm²
Operating Temperature: -40°C to +125°C
