MEGA MULTI-POLE POLE COMBINATION FUSE BLOCK 70V

Littelfuse

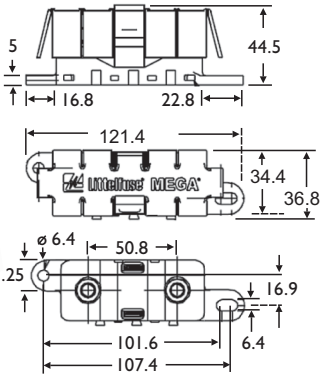

70V

Features:
- Includes a flexible cover which allows multiple cable entries, large wire size and ring terminal stack up.
- Slots on the base allow blocks to be mounted with cable ties or surface mount using standard screw holes.
- Bus bars accessories are available for common power feed across multiple blocks.
- Dovetail features allow you to interlock multiple MEGA-Flex blocks together for a high power distribution block or it can interlock with other Littelfuse products including FLEC, EPC, HWA20, HWB60 & Midi-Flex.
